

CONNECTING WITH CONFIDENCE™

Newnex Demonstrates 1394 CAT5 S400 Repeaters at 2008 International CES

Newnex Technology Corp. demonstrated their FireNEX 1394 CAT5 S400 repeater at the 2008 International CES convention in Las Vegas, NV. The Newnex demonstration showed streams of high definition (HD) content using CAT5 cable over 30 meters at a rate of 400Mbps. Although the demonstration used 30 meters of CAT5 cable, it can reach up to 65 meters at the same rate. The demonstration showed the ability to transfer HD content over a long haul connection.

Attendees were impressed and amazed by HD content transferring real time without sacrificing quality of service. Newnex provides an alternative home networking solution utilizing CAT5 cables that already exists in most homes and offices.

Newnex is World's First to Earn 1394 Compliance Logo

Newnex Technology Corp. became the world's first company to earn the 1394 Trade Association's compliance logo in March 2007 by complying with the 1394 Trade Association's Cable and Connector Compliance Test Specification. "Newnex has emerged as the first cable and connector supplier to achieve compliance," says James Snider, executive director of the 1394 Trade Association. Newnex successfully completed compliance logo testing for its 6-pin to 6-pin and 4-pin to 4-pin cables. This compliance reassures customer confidence and product reliability.

HANA at 2008 CES Show

At 2008 CES, HANA provided a demonstration that included a four-room display streaming HD content simultaneously throughout the home network. Each room provided different options of streaming content that included wireless HDMI, CAT5, and plastic fiber optics. The Bonus Room set-up showcased Newnex's FireNEX 1394 CAT5 repeaters.

Newnex Joins HANA

Newnex joins the High-Definition Audio-Visual Network Alliance (HANA) as a member. HANA is the first cross-industry collaboration to address the end-to-end needs of connected, high-definition, home entertainment products and services
