

How to Use FireNEX-10G with Laptop

As FireNEX™-10G comes with PCIe host adapter that need to be installed on PCIe slot, here is how laptop user to use FireNEX-10G for their extension need.

Basically, laptop users need a Thunderbolt 3 to PCIe expansion unit to adapt the Thunderbolt 3 port on their laptop to PCIe which can be connected to FireNEX™-10G. Please make sure your laptop has Thunderbolt 3 compliant port and to install the setup while your computer is turned off.

The following Thunderbolt 3 to PCIe Expansions have been tested by Newnex to work with FireNEX™-10G:

- [StarTech.com Thunderbolt 3 PCIe Expansion Chassis](#)
- [Highpoint Thunderbolt 3 to PCIe 3.0 Expansion Chassis](#)
